# What is H-Index

- short form for **highly cited index**
- was developed in **2005** by **Professor Hirsch**
- measure both the **productivity** and **citation impact** of the published body of work of a scientist or scholar.
- based on the set of the scientist's **most cited papers** and the **number of citations** that they have **received** in other publications.

# Formula

- A scientist has index  $h$  if  $h$  of his or her NP (number of papers) **papers have at least  $h$  citations each** and **the other  $(NP - h)$  papers have fewer than  $h$  citations each.**

# EXAMPLE 1

- **Lecturer A** published 24 papers which are ranked in descending citation order.

Article rank position	1	2	3	4	5	6	...	→	22	23	24
Citation Count	15	10	8	7	5	4	...	→	0	0	0

**Lecturer A** has an **h-index 5** if 5 of his 24 papers have at least 5 citations each.

## EXAMPLE 2

- **Professor B** published 185 papers which are ranked in descending citation order.

Article rank position	1	2	3...	→	28	29	30	...	→	183	184	185
Citation Count	191	139	102	→	29	29	28	...	→	1	0	0

**Professor B** has an **h-index 29** if 29 of his 185 papers have at least 29 citations each.

# EXAMPLE 3

A scientist has index  $h$  if  $h$  of his or her NP (number of papers) papers have at least  $h$  citations each and **the other (NP - h) papers have fewer than  $h$  citations each**

- **Professor C** published 35 papers which are ranked in descending citation order.

Article rank position	1	2	3...	→	15	16	17	...	→	33	34	35
Citation Count	182	109	98	→	23	21	11	...	→	1	0	0

**Professor C** has an **h-index 16**.

# EXAMPLE 4

A scientist has index  $h$  if  $h$  of his or her NP (number of papers) papers have at least  $h$  citations each and **the other (NP -  $h$ ) papers have fewer than  $h$  citations each**

- **Lecturer D** published 16 papers which are ranked in descending citation order.

Article rank position	1	2	3	4	5	6	7...	→	..13	14	15	16
Citation Count	51	58	27	18	10	4	4	→	3	1	0	0

**Lecturer D** has an **h-index 5**.

# How to Find an Author's *h- Index* Using **Scopus**

## Chrome 45 cease support of Scopus Document Download Manager

1. Click Author Search

Document search | **Author search** | Affiliation search | Advanced search

[Browse Sources](#) [Compare journals](#)

Author Last Name... *e.g. Smith*

Author Initials or First Name... *e.g. J.L.*

Affiliation... *e.g. University of Toronto...*

Show exact matches only

 ORCID... *e.g. 1111-2222-3333-444x*

Limit to:

### Subject Areas

Life Sciences

Health Sciences

Physical Sciences

Social Sciences & Humanities

This author's *h-index* is 31

*H-index* result

The *h-index* is based upon the number of documents and number of citations.

User can adjust different variable (e.g. the range of dates of the documents published by the author) and recalculate the *h-index*.

Note: Scopus is in progress of updating pre-1996 cited references going back to 1970. The *h-index* might increase over time.
